

USE CASES

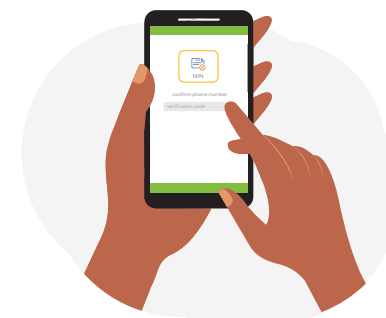

Tier 1, 2 and 3 KYC

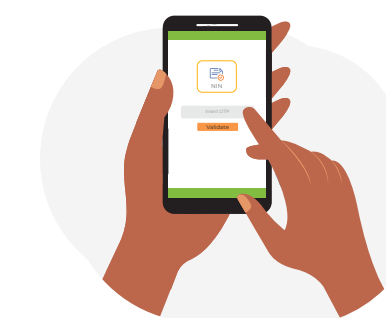

Customer visits app and selects account type.

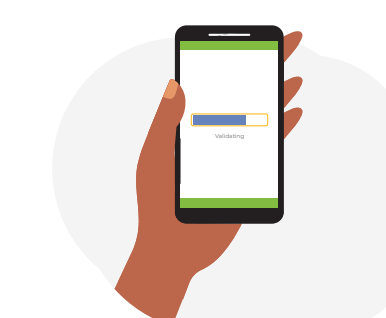

Customer enters their NIN registered phone number.

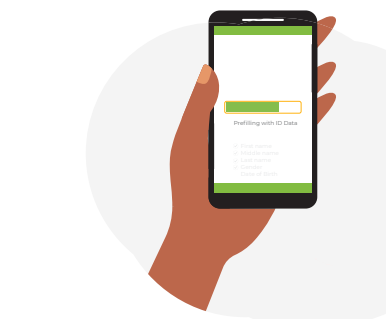

Customer will receive an OTP to their submitted phone number.

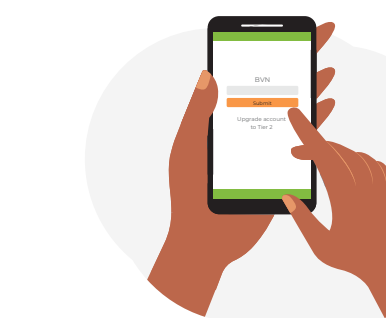

Customer submits the received OTP code.

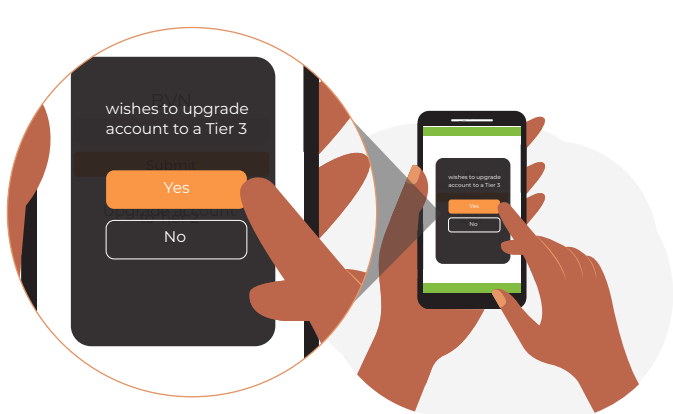

While confirming the OTP code submitted, A NIN ID verification is carried out in the background using the phone number provided.

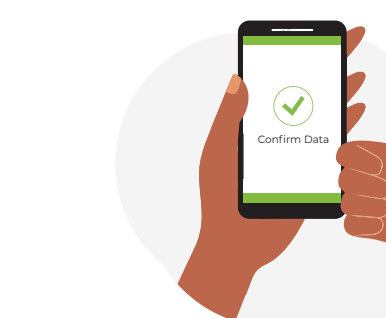

Other required fields on the online form are prefilled from the ID data.

Upgrade your account by submitting your BVN Number and increase your transaction limit.

Upgrade your account to Tier III by submitting your current residential address and remove all residential and deposit restrictions.

Customer confirms editable current residential address data and submits application.
